Cause and Effect is a relationship between events or things, where one is the result of the other or others. This is a combination of action and reaction. So, cause is what makes something happen and the effect is the result.

Review: Initiation

Initiation is how a movement is started or how a dancer begins movement. Initiation can be a body part, prop, another dancer, or music. Today, we will use a body part to initiate.

Freestyle

version of a dance in which there are few restrictions on the moves or techniques

Activity

We are going to create a “cause and effect” circle. Everyone takes 1 minute to choose one small body movement on the left side of the body (you practiced this in small groups). This will be your second movement during this activity.

Everyone will stand in a circle. The teacher will start (initiate) the first movement, and go straight into their second movement. The person to the left of them will initiate their first movement using the last person's second movement. Each movement will be passed around the circle until you get back to the first person again.
