

Arts Festival Celebrating Africa

Students and Teachers spent two weeks learning about and celebrating African countries and their cultures and art forms. They experienced African dance, music, storytelling, and visual arts. Since parents and the community could not visit the school we extended the learning to each student's home with a packet of materials to create art at home with their family. At the conclusion of the festival we produced a video of the students with their artwork from the celebration of learning through the arts and sent it to our internal and external school communities.
